

Press Release: Forizons and Uбудu announce a strategic partnership

February 23rd, 2018

To our valued customers, suppliers and partners

HONG KONG – PARIS, **Forizons** (formerly Freelog consulting) and **Uбудu** are pleased to announce a strategic partnership in the Internet of Things (IoT) to offer our clients an end-to-end service offer dedicated to flow performance management by leveraging the latest digital technologies.

From precise data capture, to business recommendations through Advanced Analytics, the renowned expertise in Supply Chain and logistics from **Forizons**, and high-accuracy & real-time Geolocation System from **Uбудu** will combine a unique value proposition within the Industry 4.0 environment. Both companies are delighted to offer their complementary skills in hardware, software and consulting aspects of IoT projects to accompany businesses in their digital transformation for higher productivity and security of their operations.

“Being a end-to-end flow specialist means being capable to capture smart data at any time and step of the process with a high level of accuracy. Uбудu Geolocation System is what we needed, but more importantly what our clients are requesting” says Charly Limou, one the Managing Partner of Forizons and in charge of Forizons APAC

“We are very excited to partner with Forizons whose expertise and experience in end-to-end flow management combined with our Geolocation System will enable us to rapidly build value and bring high returns on investments to our clients in the fields of Logistics, Manufacturing and Supply Chain” says Victor Bogey, Uбудu Asia General Manager.

About Forizons

Founded in 2000, Forizons is a French-based company recognized as one the leading consulting firms in end-to-end flow management.
